The Story:

Maine School Administrative District #5's Tech plan includes quite a bit of material adapted from the SETDA tool kit with school-specific metrics. Some of the categories that are covered in this technology plan are as follows: collaboration with adult literacy providers, professional development, strategies for improving academic achievement and teacher effectiveness, innovative delivery strategies, integration of technology with curricula, instruction, and assessment. This plan includes the integration of the SETDA (State Educational Technology Director's Association) Toolkit Resources to create lifelong learners who are technologically literate. The tech plan aims to ensure that the proper technological support and infrastructure is provided to the learning community in the district.
